

FOR IMMEDIATE RELEASE

INSIGHTS ANALYTICS, SARAWAK AI CENTRE INK MOU TO DRIVE AI AND DIGITAL TWIN ADOPTION

Kuching, 22 October 2025 – ACE market-bound technology solutions provider Insights Analytics Berhad (“Insights Analytics”) (“英析集团”) has entered into a Memorandum of Understanding (“MOU”) with Sarawak Artificial Intelligence Centre Sdn Bhd (“SAIC”) to collaborate on the joint development and deployment of artificial intelligence (“AI”) and digital twin technologies across key economic sectors.

Under the MOU, Insights Analytics and SAIC will work synergistically to create sovereign AI platforms and advanced analytics solutions for the energy, water, construction, transport, and agriculture sectors, supporting Sarawak’s drive towards a smart, low-carbon and data-driven economy.

The collaboration also includes the establishment of pilot projects, demonstration sites and training programmes to promote AI adoption, further strengthening Sarawak’s position as a regional hub for digital innovation.

SAIC, which is wholly owned by the Sarawak government, will provide research infrastructure, facilities, and institutional support for the initiatives, while coordinating engagement with government agencies, academia, and industry players to align regulatory and policy frameworks.

Insights Analytics, meanwhile, will contribute its technical expertise, proprietary AI platforms and R&D capabilities, and lead the commercialisation strategy to scale the deployment of AI and digital twin solutions in domestic and international markets.

Ts. Frank Wee (黄剑辉), Managing Director of Insights Analytics, said the collaboration reinforces the company's commitment to advancing homegrown technology solutions that support Sarawak's Post COVID-19 Development Strategy 2030 ("PCDS2030").

"This collaboration marks a significant milestone in our journey to build sovereign AI capabilities for Sarawak. By combining our technological innovation with SAIC's institutional strength, we aim to accelerate the adoption of AI and digital twin technologies that drive efficiency, sustainability and smarter decision-making across industries," he added.

About Insights Analytics Berhad

IAB is principally involved in the supply of water technology solutions for water management across the water utility supply chain from water treatment to distribution, primarily in Sarawak.

The Company also provides intelligent asset management solutions for customers in other industries such as hospitality, transportation and construction.

Its key customers include major water agencies in Sarawak such as Jabatan Bekalan Air Luar Bandar Sarawak ("JBALB"), Sibu Water Board, Sarawak Water Sdn Bhd (formerly known as LAKU Management Sdn Bhd) and Kuching Water Board.
